# New Wave Drying Systems

## OUR SYSTEMS

We proudly introduce the first human body drying unit and several different drying units for your pets and animals. Our drying unit not only dries your body in a matter of minutes, it is convenient and easy to use.

Simply step out of your shower, tub, jacuzzi or pool and turn on the controls and now you are in the most soothing and relaxing drying environment possible. The control panel consists of 3 switches. An auto shut-off minute timer which also activates the overhead light, an air volume-speed control and the air temperature control.

Our drying unit virtually eliminates the need for bath towels. No more putting on your clothes over a damp body which can cause embarrassing body odors.

The warm air coming from our drying unit will help prevent bacteria and germ formation. Our drying unit will also help reduce pain caused by arthritis, rinitis and muscular aches.

After you experience our drying unit you will wonder why this system has not been a standard bath room fixture of modern times. Times are changing and our drying units will soon become as popular as a shower or tub.

Another useful feature of our drying unit is that you can hang your damp hand washables inside and let them dry wrinkle and damage free.

## ECO FRIENDLY

Our drying units are a big plus because they are environmentally friendly. Pollution free!

By using these units you reduce water consumption, soap usage, electricity and waste water.

Think of the long term savings of laundry and towel expenses.

**INTRODUCING  
THE FIRST AND  
ONLY BODY  
DRYING  
SYSTEMS ON  
THE MARKET**

*Our units thoroughly  
dry your body after  
you bathe, shower or  
swim*
